Profile

I am a fresher full stack web developer with expertise in python Django. I'm passionate about software development and i am excited about the opportunity to shape the IT development with my skills.

Education

2022/08 – 2023/03
Ernakulam, India

Python Django Full-stack Web Development

Techwingsys

I completed a 6 month course with internship from Techwingsys, Ernakulam. From there, I finished a complete project by self, which is a Online Learning platform by Python Django. And i also worked on Techwingsys's own projects as a freelancer.

2018/09 – 2022/05
Ernakulam, India

BTech in CIVIL ENGINEERING

MBITS Engineering College, Nellimattom

I completed my BTech Degree under Kerala Technical University(KTU) from MBITS engineering college, Nellimattom, which is accredited by NAACC. From there, I completed 2 project about multi-Storied Building and conducted 1 seminar about Vertical Cities.

2016/08 – 2018/03
Ernakulam, India

Senior Secondary Education (Computer Science)

Jayakeralam HSS, Pulluvazhy

I completed my senior secondary education from Jayakeralam HSS, Pulluvazhy. And i scored overall 68% and B+ on computer science itself.

Projects

Online E-Learning Platform

Python Django is used to complete the project

Prodigy is a basic online learning platform which is made under Python framework Django. I completed this work for 7-month internship on Python Django by an institute named Techwingsys, Ernakulam. This project is fully completed by myself.

From this project I learned how to manage and execute codes and the management of database. I contribute Python programming language for it's backend development and HTML, CSS and JavaScript for it's templets. For the special feature for the project, I added Razor Pay, which is an online money transaction platform. Which is successfully working.

On working on this project, I got many errors and I corrected my myself by doing researches on the Google. And I finished the work by 2 weeks. After that I updated my project to a fully working prototype by step by step. And the project is uploaded to GIT by step-by-step process under my profile.

Skills

Python Django

Django 4.2.5

HTML

HTML 5

JavaScript

Bootstrap

Bootstrap 5.3

Database design and management

RESTful API development

C Language

Python Language

Python 3.12
