🔗 Portfolio

Profile

Aspiring to excel in an environment that fosters professional growth, I seek opportunities to leverage my expertise effectively. My profile is defined by exceptional communication and interpersonal competencies, complemented by a track record of thriving independently and as a collaborative team player. I am dedicated to making valuable contributions while advancing my career

Education

BTech in CIVIL ENGINEERING
MBITS Engineering College, Nellimattom
2018/09 – 2022/05 | Ernakulam, India

Senior Secondary Education (Computer Science)
Jayakeralam HSS, Pulluvazhy
2016/08 – 2018/03 | Ernakulam, India

Professional Experience

Intern Fullstack Devoleper
Techwingsys
2022/09 – 2023/04

- Collaborating with senior developers and designers to
implement web applications using HTML, CSS, and JavaScript, ensuring high-quality user experiences.
- Experience in Frontend/Web technologies and backend
services.
- Engaging in ongoing teamwork, attending regular meetings, and participating in code reviews to maintain
a collaborative and innovative work environment.
- Actively participated in various projects & initiatives to
contribute to the company's success.

Projects

Income Expense Tracker (Backend)
Express.js and MongoDB

- I have practical experience in developing a full-stack web application using Express.js and MongoDB.
- The project was focused on the development of an income-expense tracker system that included user authentication, category management, and transaction recording functionalities.
- I developed the schema design for users, categories, and transactions, ensuring the effective storage and retrieval of data.
- Currently, I am expanding my skills by working on the frontend development of the project, using technologies like React.js for the creation of an efficient and friendly interface.

Online E-Learning Platform
*Python Django is used to complete the project*

- During a 7-month internship at Techwingsys, Ernakulam, I developed Prodigy, an online learning platform using the Python Django framework.
- This project honed my skills in code management, database administration, and backend development.
- I used Python for backend logic and integrated HTML, CSS, and JavaScript for frontend templates. In addition,
- I integrated Razor Pay for secure online transactions to further enhance my experience in web development and payment gateway integration.

Banking App
Python OOPs

- Implemented a comprehensive Python project for the development of concepts in object-oriented programming.
- Designed and developed features of money crediting, debiting, and account balance maintenance using advanced principles in object-oriented programming.
- The project included complex logics of transaction management, which ensures high robustness and efficiency in handling financial operations.

Skills

Express.JS	**MVC**	**MongoDB**
Postman	**React.JS**	**React-Redux**
Restful API	**JavaScript ES6**	
Version Control (Git)	**Python Django**	
MVT	**Python Language**	
PostgreSQL	**HTML**	
Cascading Style Sheets		
Database design and management		
Object- Oriented Programming — (OOPs)		
NoSQL	**SQL**	**C++**	**C Language**
MicroSoft Office		

OLX Clone

React and JavaScript ES6

- Developed an OLX clone, a multi-page web application with React, using Firebase for database connectivity.
- Expertise includes user authentication, data fetching, and the usage of React libraries.
- The knowledge of JSX syntax comes in handy while doing front-end development.

Practical Skills

Strong interpersonal communication skills

Excellent troubleshooting and analytical skills

Decision-Making

Effective Collaboration and Teamwork.

Certificates

- Python Development Certified Professional (Techwingsys)
